MOBILE SOLUTIONS

Visitor Management to go!

Extend Security and Visitor Management – Connect from Anywhere!

Symbol Handheld Solution

PassagePoint Mobile combined with the Symbol Handheld and Zebra Mobile printer allows visitors to be processed and badges printed from any remote or outdoor location. If a wireless network is available, visitor data will be updated in real-time to a PassagePoint client server. Otherwise, all visitor data will be stored on the handheld until the unit is placed on a docking station connected to a PassagePoint client workstation that not only synchs the visitor data, but also acts as a charging station for the unit.

The Symbol unit runs Windows Mobile OS, with a unique PassagePoint visitor management interface that enables searches of pre-registered visitors, pre-authorized contacts, active visitors already signed in, and those who have been signed out that day.

The Symbol unit includes a mag stripe reader for scanning and inputting info from driver licenses, a barcode reader for signing people in and out, and an optional Zebra wireless printer for printing badges on the spot.

Symbol Handheld & Zebra Mobile Printer

Panasonic Toughbook U1
Ultra-Mobile-Rugged PC

Panasonic Toughbook Solution

Combine the Panasonic Toughbook with Mobile Broadband and PassagePoint Global or EDU for a complete, real-time client and completely mobile visitor management solution.

The Panasonic Toughbook with Windows XP or Vista enables all PassagePoint features and functionality to run seamlessly in outdoor or remote locations.

In addition to traditional visitor sign-in, license scanning, and on-the-spot badge printing, you can conduct full visitor enrollment just like you would from a lobby station or kiosk. Compare visitors against watch lists, do directory look-ups, capture photos, and enable e-mail notifications upon visitor sign-in.

This compact laptop measures 5.9”L x 7.2”W x 2.2”D and weighs only 2.3 lbs with strap and batteries. Swappable twin batteries give the Toughbook extended life and therefore improve productivity.

Common Uses: Security officers patrolling campuses, guards at contractor entry gates or checkpoints, checking visitors at multiple locations to create accurate audit trails, and those manning parking or dock entrances.

Choose the PassagePoint Mobile Solution that's right for you!

Specifications
